

Sales Analytics Dashboard

Name: MohammmadHashim Kadivar

**Domain: Data Analytics & Business Intelligence (Excel + SQL +
Power BI/ Tableau)**

Date: 27/06/2026

Task-2: Data Modeling, DAX Calculations & Executive - Level BI Dashboard.

- **Business Performance Analysis:**

- 1. Is the business growing continuously?**

The business is not growing consistently throughout the year. Monthly sales fluctuate, with some months showing significant growth while others experience a decline. However, the overall trend indicates an increase in sales toward the end of the year, suggesting positive long-term business growth.

- 2. Which region is driving the most revenue?**

The **West** region generates the highest revenue, contributing approximately **\$350K** in total sales. It is followed by the East, Central, and South regions. This indicates that the West region is the strongest performing market and plays a significant role in overall business revenue.

- 3. Which category has highest margin?**

The **Technology** category has the highest profit, generating approximately **\$42K**, followed by Furniture (**\$40K**) and Office Supplies (**\$37K**). This suggests that Technology products contribute the greatest profitability to the business.

- 4. Are there seasonal trends?**

Yes. Monthly sales analysis reveals noticeable seasonal variations. Sales gradually increase during the middle of the year and reach their highest levels during the final months, particularly in **November and December**. This pattern suggests increased customer demand during the year-end period.

- 5. Which customer segment is most valuable?**

The **Consumer** segment is the most valuable customer group, contributing approximately **51%** of total sales. Corporate customers contribute around **31%**, while the Home Office segment contributes approximately **18%**. This indicates that Consumer customers are the primary source of revenue.

- 6. Where should management focus?**

Management should focus on:

- Expanding sales strategies in the West region to maximize revenue.
- Increasing investment in Technology products due to their high profitability.
- Improving sales performance in the South and Central regions.
- Developing marketing campaigns targeting the Consumer segment.
- Preparing inventory and promotional strategies before the year-end peak sales season.

- **List of DAX Measures:**

Measures	Purpose
I. Total Sales	To Calculate total sales revenue
II. Total Profit	To Calculate total profit
III. Total Orders	To Count unique orders
IV. Total Customers	To Count unique customers
V. Profit Margin	To Calculate profit as a percentage of sales
VI. Previous Month Sales	Return sales from the previous month
VII. Growth %	To Calculate month-over-month sales growth
VIII. Calendar Table	To Create calendar table

- **Executive Summary:**

The Sales Performance Dashboard provides a comprehensive overview of business performance using interactive visualizations and KPI metrics. The analysis shows that although monthly sales fluctuate, the business demonstrates positive growth toward the end of the year. The West region is the highest revenue contributor, while the Technology category generates the highest profit. The Consumer segment represents the largest customer base and contributes more than half of total sales. Seasonal analysis indicates stronger sales during the final months of the year, highlighting opportunities for targeted marketing and inventory planning. These insights enable management to make informed, data-driven decisions that can improve profitability, optimize regional performance, and support sustainable business growth.
